# Consolidated Financial Results Supplementary Document Q1 FY20

August 3, 2020 / SIGMAXYZ Inc. (Stock Code: 6088)

# Outline of Financial Results for Q1 FY20

| Sun | nmary                      |                  | (YoY change) |
|-----|----------------------------|------------------|--------------|
|     | Consolidated revenue       | 3.36 billion yen | (-12%)       |
|     | Profit before income taxes | 309 million yen  | (+4%)        |

87 million yen (-46%)

- Despite the growth in ERP cloud migration services, revenue declined due to the
  decrease in the consulting services for the aviation industry, which has been severely
  affected by the COVID-19 pandemic. The decline is also due to the decrease in product
  sales, which involved the procurement of hardware and software products for call
  center projects in the retail industry.
- Selling, general and administrative expenses increased by 9% due to increased costs incurred for measures taken for the COVID-19, personnel and other costs associated with recruitment, and investments for solution development and productivity improvement.
- The sale of the entire stake in Lawson Digital Innovation Inc. resulted in a 4% increase in the profit before income taxes.

1Q FY 20

# Migrating ERP to the Cloud

In readiness for the situation called the "2025 Digital Cliff," when the existing ERP maintenance support expires, SIGMAXYZ supports clients to enhance their corporate value by smoothly migrating their ERP to a cloud environment, and carries out organization/business transformation and change management, based on the growth scenarios for clients that we provide.

We are a leader in the industry, with consultants who have acquired a total of 38 certifications of the SAP S/4HANA Cloud certification (as of the end of June). This certification is a qualification for consultants who offer ERP cloud services.

# SAP Award of Excellence 2020 "Project Award" winning project SIGMAXYZ supported the NTT Advanced Technology Corporation's core IT system reform project, and completed the migration of key systems to the cloud in about six months. The project used SAP S/4HANA Cloud's multitenant edition, which is SAP's next-generation cloud ERP (Enterprise Resource Planning) package. It was the first time multiple modules (financial accounting, management accounting, sales management, purchase management, and

project management) were implemented all in

one to go for a Japanese company's domestic

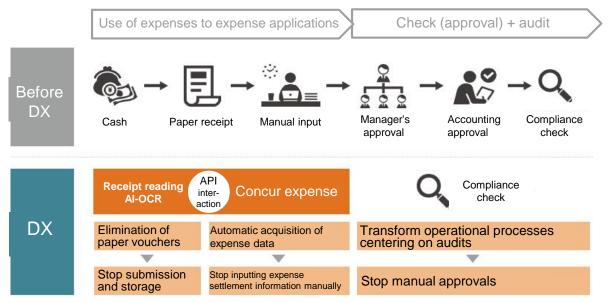

operations. (As of June 2019)

# Digital Transformation of Indirect Operations

SIGMAXYZ Inc. has achieved complete digitization of expense settlements and invoice management for indirect material purchases. Based on the knowledge we have gained from this, we have started providing a service for the "digital transformation of indirect operations."

In order to promote this service, we have developed solutions and partnerships, utilizing various types of SaaS, including Concur. Aiming for nationwide market expansion.

#### Image of process innovation with DX for expense settlement in the company

- Reduced the number of man-hours by 28% per employee
- Eliminated manager's approval process (average of 120 minutes per month) Nikkei Computer (issued on April 18, 2019)

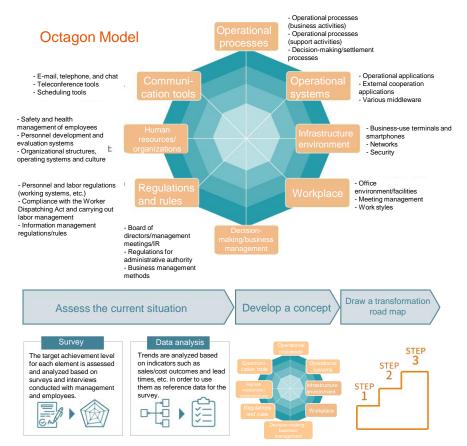

#### Customer example

We assisted SHIONOGI & CO., LTD. in introducing an operational process and cloud services for expense settlements—both which comply with the Electronic Books Storage Act, and achieved complete digitization of the expense settlement process, including digitization of its vouchers. We completed the introduction of the new operational process and its system for all 5,000 employees in 10 months.

# Business Operations in the Era of Fully Remote Work

As the spread of COVID-19 significantly impacts society and the economy on a global scale. SIGMAXYZ Inc. has started to offer its own perspectives as a comprehensive package. This includes corporate business management that we put into practice ourselves in the era of COVID-19. We have modeled eight elements including operational processes and systems, various rules, and tools, which need to be designed and organized in cooperation with each other in order to ensure the stable business operation of a company, and provide mixed solutions that include each perspective.

#### Fully remote work environment at SIGMAXYZ Inc.

The number of seats is 1/5 the number of employees! The office is a place for

Freedom to choose work hours and workplace. How can employees be evaluated when you do not meet them in person?

Essential equipment for an "office from anywhere"

A yellow light indicates urgent attendance at the office. A "Management ambulance" supported by real-time business

Morning meetings, exercises and reviews are done online. Training of fresh graduates through video conferences. Is it effective?

All that's needed is a team with employees who are self-controlled and self-

Reduced the work time of employees by 28%. "Receipt gluing" for expense settlements is no longer necessary!

device per floor. What is a fully paperless office really like?

#### The future of "managers and employees that do not see each other"

Working in an office is no longer essential, and our work style has changed a great deal. Since we don't meet each other every day, we share each other's responsibilities and goals. We let team members manage their day-to-day operational progress on their

I used to worry when I could not see my staff and check the orders they received, etc. but because key indicators like these can now be checked in real time on the web dashboard, I no longer have these

The personnel evaluation system has also changed significantly, and a capability-based evaluation system has been introduced. I conducted year-end evaluation interviews in person or online, depending on each member's work situation. I evaluate them with a focus on their output to the goals set at the beginning of the year. One of my staff members made work improvements by introducing a new tool that no one was aware of, and reported his achievement happily. It appears that the work efficiency and motivation of my staff are increasing.

# Digital Workplace Environment

Since its inception in 2008, SIGMAXYZ has developed and maintained a digital workplace environment based on strict security policies.

The aim is to provide employees with the freedom to choose the time and location that best suits their value creation activities. Through the following environment and mechanisms, we will use the digital platform in all areas related to business operations, and develop business activities that are independent of office work.

- Access to digital and mobile tools for all employees
- Digital distribution of internal information and paperless operations
- Use of collaboration tools such as web conferencing and business chat systems
- Process various internal operations such as expense settlement digitally
- Use real-time operation management system to visualize operations
- Skill-based human capital evaluation system
- Office operations via company-wide free address system

# Presenting Information as a Leading Company in Food Innovation

We have participated in government-led workshops as a core member. We have also received media coverage, and provided information through lectures, contributions, and publications.

In July 2020, consultants in this field published the first food business book in Japan, "The Food-Tech Revolution", in which they thoroughly detail how "food" acts in the era of COVID-19 and post COVID-19, and the cutting-edge food business.

- ✓ "The Future of Food Tech 2019-2025" (Nikkei BP, 2018)
- √ "Food Tech Revolution" (Nikkei BP, 2020)

# Enhancing Non-financial Value (SDGs and ESG initiatives)

We believe that the value of a company is a synthesis of financial and non-financial value, and place importance on Sustainable Development Goals (SDGs) and Environmental, Social and Governance (ESG) factors in promoting our business.

#### **SDGs**

 We strive to expand value-added activities to address social problems as well as our clients' issues.

On commencement of the project, a forum for consensus building is set up with the client concerning which items pertaining to the SDGs' 17 goals are to be achieved, and how.

#### **ESG**

 We have implemented paperless internal information sharing processes\*, and have stopped offering beverages in PET bottles and switching clear folders made of plastic materials to paper-based ones in our business premises.

(\*Monthly number of copy/print paper used per employee for the fiscal year ending March 31, 2020 : 160 sheets [12% decrease from the previous year])

- We are working on building a "social multi-sided platforms" to form an ecosystem where people in Japan and overseas who empathize with and support our initiatives gather to address social issues.
- With regard to the corporate governance system, the ratio of independent outside directors is 58%, and all of the members of the Audit & Supervisory Committee and the Compensation Committee are outside directors.

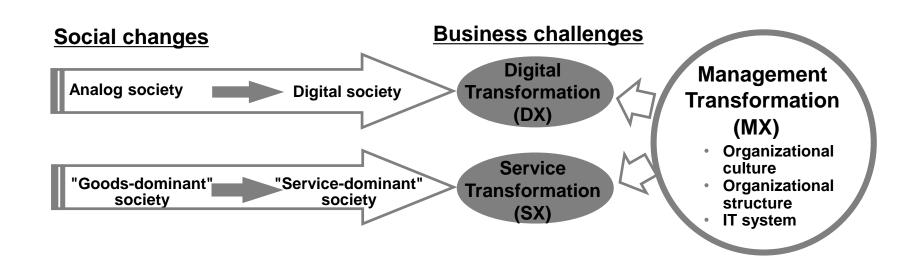

# Our Digital Transformation: Three Innovations

1) Digital Transformation (DX)

Streamline existing business operations

2) Service Transformation (SX)

- Create new value
- 3) Management Transformation (MX)
- Management platform reform

## SIGMAXYZ's Business

In response to the various business challenges that companies face, SIGMAXYZ provides consulting services in a wide range of fields, and launches and operates related forms of business.

In addition, we aim to promote value creation activities that go beyond the boundaries of a single company or industry, by forming an ecosystem through networks with a diversity of professionals and companies.

# FY20 Consolidated Earnings Forecasts

| Unit: Million yen                       | FY 20     | Increased/decreased<br>amount to the<br>previous fiscal year | Increased/decreased rate to the previous fiscal year |
|---|-----------|--|--|
| Revenue                                 | 14,500    | -1,503   | -9%  |
|   | to 15,500 | to -503  | to -3%   |
| Profit before income taxes              | 1,750     | -426   | -20%   |
|   | to 2,350  | to +173  | to +8%   |
| Profit attributable to owners of parent | 1,050     | -357   | -25%   |
|   | to 1,520  | to +112  | to +8%   |

Revenue: Disclosed a range of amounts instead of a specific value because it includes product

sales of hardware and software procurement services for call center projects in the

retail industry.

Profit: Since capital gains and earnings from business investments, which are similar to

contingency fees, may be special profits for accounting purposes, the ordinary profit

will remain pending, and we will disclose a range of amounts of the profit before

income taxes and profit attributable to owners of parent.

# **Dividend Policy**

- Focus on striking a balance between shareholder returns and internal reserves, in order to strengthen the financial structure and prepare for future development of business.
- Ensure consistent and stable payment of dividends.
  - The dividend per share for FY20 : JPY 22.
